NOTE: This is a 'working draft' sequence. It currently consists of 20 contigs. The true order of the pleces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   * NOTE: This is a 'working draft' sequence. It currently consists of 17 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N. but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Center: Washington University Genome Sequencing Center
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   contig of 1862 bp in length
gap of unknown length
contig of 1774 bp in length
gap of unknown length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      contig of 3089 bp in length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      bp in length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      bp in length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    bp in length

Acanthamoeba myosins I. An improved method for locating the phosphorylated amino acid.";

J. Biol. Chem. 264:19340-19348(1989).

-!-FUNCTION: MYOSIN IS A PROYELN THAT BINDS TO F-ACTIN & HAS ATPASE ACTINTY THAT IS ACTIVATED BY F-ACTIN.

-!-SUBULIT: MYOSIN I HEAVY CHAIN IS SINGLE-HEADED. DIMER OF A HEAVY AND A LIGHT CHAIN. INABILITY TO SELF-ASSEMBLE INTO FILAMENTS.

-!- DOMAIN: TH.1 BINDS DIRECTLY TO ANIONIC PHOSPHOLIPID MEMBRANES;

"Vascular endothelial growth factor induces cyclooxygenase-dependent proliferation of endothelial cells via the VEGF-2 receptor."; PASEB J. 15:1667-1669(2001).
-!-FUNCTION: Growth factor active in angiogenesis, vasculogenesis an endothelial cell growth. It induces endothelial cell prowits cell migration, inhibits apoptosis, and induces permeabilization of blood vessels. It binds to the VEGFRI/FIt-1 and VEGFRZ/Kdr receptors and to heparan sulfate and heparin. Neuropilin-1 binds isoforms VEGF-165 and VEGF-145.
-!-SUBUNIT: Homodiamer; disulfide-linked. Also found as heterodimer with PIGF (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                SEQUENCE FROM N.A.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PKVD----ERKTAWGERNGQKRSRRRGTRAGGFCTPRYMS------CLRDAEPPSPT 56
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     extracellular matrix, although it may be released as a soluble form by heparin, heparinase or plasmin.

ALTERNATIVE PRODUCTS: 7 isoforms; VEGF106 (shown here), VEGF189, VEGF185, VEGF145 and VEGF121; may be produced by alternative splicing.

TISSUE SPECIFICITY: The VEGF189, VEGF-165 and VEGF-121 isoforms are widely expressed, whereas the VEGF206 and VEGF-145 are
                                                                                                                                                                                                                                                                                                                                                                                                                                          VEGFIGS is more basic, has heparin-binding properties and, although a signicant proportion remains cell-associated, most freely secreted. VEGF189 is very basic; it is cell-associated after secretion and is bound avidly by heparin and the

BACKBONE BOND, IT SIMULTANEOUSLY FORMS A PROTEIN-DNA LINK, IN WHICH A TYROSYL OXYGEN IN THE ENZYME IS JOINED TO A DNA HOSPHORUS AT ONE END OF THE ENZYME-SEVERED OBA STRAND (BY SIMILARITY). SIMILARITY: BELONGS TO PROKARYOTIC TYPE I/III TOPOISOMERASE

MISCELLANEOUS: WHEN A TOPOISOMERASE TRANSIENTLY BREAKS A DNA

OM protein - protein search, using sw model

Run on: February 19, 2003, 15:32:08; Search time 17 Seconds

Title: 570
Sequence: 1 MSWFSGLLVPKVDERKTAWG......RAVALGFEDTEVTTTPAGPL 104

Scoring table: BLOSUM62
Scoring table: BLOSUM60
Gapop 10.0, Gapext 0.5
Searched: 283224 seqs, 96134422 residues

Total number of hits satisfying chosen parameters: 283224

Minimum DB seq length: 0
Maximum Match 0%
Maximum Match 100%
Dost-processing: Minimum Match 100%
Listing first 45 summaries
```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

hear

```
A Map position: 6p21-6p1.

C. Function:
C. Function: promotes [1 ind and protein leakage from blood vessels
C. Function:
C. Feywords: alternative splicing; analogenesis; dimer; disulfide bond; extracellular
F.1-232/Product: vascular endothelial growth factor 206 precursor #status predicted <
F.1-165,183-232/Product: vascular endothelial growth factor 189 precursor #status pre
F.1-141,227-232/Product: vascular endothelial growth factor 121 precursor #status pre
F.1-26/Domain: signal sequence #status predicted <SIGs
F.1-161/Binding site: carbohydrate (Asn) (covalent) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Rioliver, K.; Harris, D.; Bentley, S.D.; Parkhill, J.; Barrell, B.G.; Rajandream, M.A submitted to the EMBL Data Library, June 1999
